## What is curriculum?

- “curriculum is broadly defined as the totality of student experiences that occur in the educational process”
- Specifically: “a sequence of planned experiences where students practice and achieve proficiency in content and applied learning skills. It is a central guide for all educators as to what is essential for teaching and learning, so that every student has access to rigorous academic experiences”

# What is method?

## **method**

měth'əd

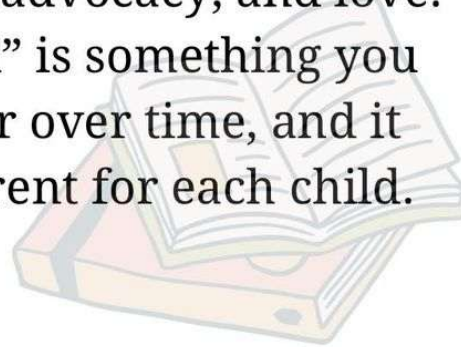

## **noun**

1. A means or manner of procedure, especially a regular and systematic way of accomplishing something.
2. Orderly arrangement of parts or steps to accomplish an end.
3. The procedures and techniques characteristic of a particular discipline or field of knowledge.

## **THERE ARE MANY WAYS TO HOMESCHOOL.**

Take your time to learn about your child and what works for them. What matters is your commitment, advocacy, and love. The “method” is something you will discover over time, and it may be different for each child.

The same instincts that led you to nurture your newborn, care for your infant, and guide your toddler are exactly the same instincts that you can tap into to be the best navigator of your child's learning journey.

## Understand yourself, too!

## Method meets curriculum

- I promise to not define my homeschool by one and only one method for the duration of our journey.
- I promise that I will move on from a curriculum that is not working for my learner, no matter how much I paid for it.
- I understand that there is no “unicorn” curriculum or methodology that will solve all the problems in our homeschool.
- I promise to be open to the Lord refining me and revealing Himself as I home educate my child/ren.

"It is okay to pick  
a curriculum and find  
that it is not a great fit.  
That just means that you have  
learned something about your  
child, and that is part of  
homeschooling!"  
- Tracy Glockle
